Test Plan: EPAM SolutionsHub Website

Date: March 8, 2026 | Prepared by: QA Team | Site: https://solutionshub.epam.com/

1. Introduction

This Test Plan defines the scope, approach, resources, and schedule for testing the EPAM SolutionsHub website. The plan covers five primary navigation tabs: Solutions, Assets, Guides, Blog, and About. Testing is aimed at verifying functional correctness, usability, cross-browser compatibility, and UI consistency of the public-facing website.

2. Objectives

- Verify that all five main navigation tabs are functional and accessible
- Validate search, filtering, and browsing capabilities within each section
- Ensure correct UI rendering across major browsers and screen resolutions
- Confirm all links, buttons, and interactive elements work as expected
- Identify and document any defects prior to release

3. Scope

3.1 In Scope

- Solutions tab – navigation, filtering, catalog browsing, solution cards
- Assets tab – asset browsing, filtering by type and competency center
- Guides tab – guide listing, navigation, content display
- Blog tab – blog post listing, navigation, reading view
- About tab – company information, page content, links
- Cross-browser testing: Chrome, Firefox, Edge, Safari
- Responsive design: Desktop (1920px), Tablet (768px), Mobile (375px)

3.2 Out of Scope

- Backend API testing
- Performance and load testing
- Authenticated user flows (login, user accounts)

- Security/penetration testing

4. Testing Types

Testing Type	Priority	Description
Functional Testing	High	Verify navigation, filtering, search, and content display work correctly
UI/Visual Testing	High	Validate layout, typography, colors, and visual elements match design
Cross-Browser Testing	High	Ensure consistent behavior on Chrome, Firefox, Edge, and Safari
Responsive/Mobile Testing	Medium	Test site usability on different screen sizes and resolutions
Link & Navigation Testing	High	Verify all internal/external links and navigation paths work
Content Testing	Medium	Check accuracy and completeness of static and dynamic content
Accessibility Testing	Low	Basic keyboard navigation and screen reader compatibility

5. Risk Assessment

Risk Description	Probability	Impact	Mitigation Plan
Content changes during testing cycle	Medium	Medium	Take baseline screenshots; lock content freeze period
Third-party integrations failing	Low	High	Mock external services or test in isolated environment
Browser-specific rendering differences	Medium	Medium	Maintain browser matrix; test on all listed browsers
Dynamic content loaded asynchronously	High	Medium	Use explicit waits; test with slow network throttling
Incorrect filter/search results	Medium	High	Create comprehensive data-driven test cases for filters

6. Resource Planning

Role	Responsibilities	Quantity
QA Lead	Test plan creation, test case review, defect triage, reporting	1
Manual QA Engineer	Test execution, defect reporting, regression testing	2
Automation QA Engineer	Automated smoke and regression suite creation	1

7. Test Schedule

Phase	Activity	Duration
Week 1	Test planning, requirement analysis, environment setup	5 days
Week 2	Test case creation for all 5 tabs	5 days
Week 3	Test execution – Solutions and Assets tabs	5 days
Week 4	Test execution – Guides, Blog, About tabs	5 days
Week 5	Regression testing, defect re-verification, reporting	5 days

8. Entry and Exit Criteria

Entry Criteria

- Test environment is accessible and stable
- Test cases have been reviewed and approved
- Test data is available for all scenarios

Exit Criteria

- All High priority test cases have been executed
- No open Critical or High severity defects
- Test summary report has been delivered

9. Deliverables

- Test Plan (this document)
- Test Checklists per tab

- Test Cases per tab
- Defect Reports in Jira
- Test Summary Report

Test Checklists – EPAM SolutionsHub

Tab 1: Solutions

#	Checklist Item	Priority	Result
1	Solutions page loads without errors (200 OK)	High	
2	Main header navigation is visible and 'Solutions' is highlighted as active	High	
3	Solutions catalog grid/list is displayed on page load	High	
4	Filter panel is visible and contains filter options (Industry, Category, Type, License)	High	
5	Selecting an Industry filter updates the catalog results	High	
6	Selecting a Category filter updates the catalog results	High	
7	Multiple filters can be applied simultaneously	Medium	
8	Clearing filters restores the full catalog	High	
9	Each solution card displays: title, description, tags, and thumbnail	High	
10	Clicking a solution card navigates to the solution detail page	High	
11	Solution detail page loads all expected content sections	High	
12	Back navigation from detail page works correctly	Medium	
13	Search functionality filters solutions by keyword	High	
14	No results state is displayed for invalid search terms	Medium	
15	Pagination or infinite scroll works when many solutions are present	Medium	

#	Checklist Item	Priority	Result
16	Page is responsive on tablet (768px) and mobile (375px)	High	
17	Page renders correctly in Chrome, Firefox, Edge, Safari	High	
18	No broken images in solution cards	Medium	

Tab 2: Assets

#	Checklist Item	Priority	Result
1	Assets page loads without errors	High	
2	'Assets' is highlighted as active in the navigation menu	High	
3	Assets catalog is displayed on page load	High	
4	Filter by Competency Center works correctly	High	
5	Filter by Asset Type (Beta Solution, Method & Template) works correctly	High	
6	Asset cards display title, description, and relevant metadata	High	
7	Clicking an asset card opens the asset detail page	High	
8	Asset detail page shows full description and relevant tags	Medium	
9	Filters can be combined (Type + Competency Center)	Medium	
10	Clearing all filters restores full asset list	High	
11	Search within assets returns relevant results	High	
12	Empty state message shown when no assets match filters	Medium	

#	Checklist Item	Priority	Result
13	Page is responsive on tablet and mobile	High	
14	Page renders correctly across all required browsers	High	

Tab 3: Guides

#	Checklist Item	Priority	Result
1	Guides page loads without errors	High	
2	'Guides' navigation link is active and highlighted	High	
3	Guides are listed on the page with title and summary	High	
4	Clicking a guide card/title navigates to the guide detail page	High	
5	Guide detail page displays full content correctly	High	
6	Guide content includes proper headings and formatting	Medium	
7	Navigation within a guide (if multi-page) works correctly	Medium	
8	Back/breadcrumb navigation returns to the Guides listing	Medium	
9	Guide images (if any) are loading without errors	Medium	
10	Page is responsive on tablet and mobile	High	
11	Page renders correctly across all required browsers	High	

Tab 4: Blog

#	Checklist Item	Priority	Result
1	Blog page loads without errors	High	
2	'Blog' navigation link is active and highlighted	High	
3	Blog posts are displayed with title, date, category, and teaser	High	
4	Blog posts are sorted by date (latest first)	Medium	
5	Clicking a blog post title opens the full article	High	
6	Article page displays author, date, and full content	High	
7	Images in blog posts load without errors	Medium	
8	Related posts or navigation between posts is available	Low	
9	Back navigation returns to Blog listing	Medium	
10	Pagination works correctly when there are multiple pages	Medium	
11	Page is responsive on tablet and mobile	High	
12	Page renders correctly across all required browsers	High	

Tab 5: About

#	Checklist Item	Priority	Result
1	About page loads without errors	High	
2	'About' navigation link is active and highlighted	High	
3	Company description/mission statement is displayed	High	
4	All sections of the About page are displayed correctly	High	

#	Checklist Item	Priority	Result
5	Any links within the About page are functional (no 404)	High	
6	'Contact Us' button (if present) is clickable and functional	High	
7	External links open in a new tab	Medium	
8	Images and logos on the page load without errors	Medium	
9	Page is responsive on tablet and mobile	High	
10	Page renders correctly across all required browsers	High	

Test Cases – EPAM SolutionsHub

Tab 1: Solutions – Test Cases

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-SOL-001	Verify Solutions page loads successfully	Browser is open; no previous session	1. Navigate to https://solutionshub.epam.com/catalog2. Observe the page	Solutions catalog page loads with HTTP 200. Catalog items are displayed. No console errors.	High
TC-SOL-002	Verify 'Solutions' tab is active in navigation	User is on the Solutions page	1. Navigate to https://solutionshub.epam.com/catalog2. Inspect the navigation bar	'Solutions' menu item is visually highlighted as the active tab.	High
TC-SOL-003	Verify filtering by Industry	Solutions page is loaded; filters are visible	1. Click on any Industry filter (e.g., Healthcare)2. Observe results	Catalog updates to show only solutions tagged with the selected industry. Filter chip is visible.	High
TC-SOL-004	Verify multiple filters can be applied	Solutions page is loaded	1. Select Industry: Healthcare2. Select Category: Artificial Intelligence3. Observe results	Results are filtered by both criteria simultaneously. Active filter chips are shown for each.	Medium
TC-SOL-005	Verify clearing all filters restores full catalog	At least one filter is applied	1. Apply any filter2. Click 'Clear All' or deselect filters3. Observe results	Full catalog is restored. No active filter chips remain.	High
TC-SOL-006	Verify search functionality	Solutions page is loaded; search bar is visible	1. Click on search input2. Type 'healthcare'3. Observe results	Catalog filters to show only solutions related to 'healthcare'. Results are relevant.	High
TC-SOL-007	Verify no results state for invalid search	Solutions page is loaded; search bar is visible	1. Type a random invalid term (e.g., 'zzzyyyxxx') in search2. Observe	An empty state message is displayed (e.g., 'No results	Medium

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
				found'). Page does not crash.	
TC-SOL-008	Verify clicking a solution card opens detail page	Solutions catalog is displayed with at least one card	1. Click on any solution card2. Observe navigation	User is navigated to the solution detail page. URL changes. Detail content is loaded.	High
TC-SOL-009	Verify solution detail page content	User is on a solution detail page	1. Navigate to any solution detail page2. Review content sections	Detail page displays: title, description, tags/category, and relevant action buttons.	High
TC-SOL-010	Verify responsive layout on mobile (375px)	Solutions page accessible from a mobile viewport	1. Set browser viewport to 375px2. Navigate to Solutions page3. Scroll and interact	All elements are visible. No horizontal scroll. Filters and cards adapt to mobile layout.	High

Tab 2: Assets – Test Cases

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-ASS-001	Verify Assets page loads successfully	Browser is open	1. Navigate to https://solutionshub.epam.com/catalog?mode=assets2. Observe	Assets catalog page loads with HTTP 200. Asset items are displayed.	High
TC-ASS-002	Verify filtering by Competency Center	Assets page is loaded	1. Select a Competency Center filter (e.g., Testing)2. Observe results	Asset list updates to show only assets under the selected Competency Center.	High
TC-ASS-003	Verify filtering by Asset Type	Assets page is loaded	1. Select Type: 'Method & Template'2. Observe results	Only assets of the 'Method & Template' type are displayed.	High

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-ASS-004	Verify combining Type and Competency Center filters	Assets page is loaded	1. Select Type: 'Beta solution'2. Select Competency Center: 'AI/ML Capabilities'3. Observe	Results are filtered by both criteria. Relevant assets are shown or empty state displayed.	Medium
TC-ASS-005	Verify asset detail page loads	Asset catalog with at least one item	1. Click on any asset card2. Observe navigation and page	Asset detail page loads. Full description and metadata are visible.	High
TC-ASS-006	Verify Assets page mobile responsiveness	Assets page accessible from mobile viewport	1. Set viewport to 375px2. Navigate to Assets page3. Interact with filters	Page adapts to mobile. Filters and asset cards are usable without horizontal scroll.	High
TC-ASS-007	Verify search within Assets	Assets page is loaded	1. Enter 'automation' in the search bar2. Observe	Asset list filters to show automation-related assets. Results are relevant.	High
TC-ASS-008	Verify empty state on no matching assets	Assets page is loaded	1. Enter 'zzzyyyxxx' in search2. Observe	An empty/no-results message is displayed. No errors occur.	Medium

Tab 3: Guides – Test Cases

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-GUI-001	Verify Guides page loads successfully	Browser is open	1. Navigate to https://solutionshub.epam.com/guides2. Observe page	Guides page loads. List of guides is displayed with titles and summaries.	High
TC-GUI-002	Verify Guides is active in navigation	User is on Guides page	1. Navigate to Guides page2. Inspect navigation bar	'Guides' menu link appears as the active navigation item.	High

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-GUI-003	Verify guide detail page loads	Guides listing page with at least one guide	1. Click on any guide title or card2. Observe navigation	Guide detail page opens. Full guide content is displayed with proper formatting.	High
TC-GUI-004	Verify guide content formatting	User is on any guide detail page	1. Open any guide2. Review content for headings, paragraphs, images	Content renders correctly: headings are styled, text is readable, images load.	Medium
TC-GUI-005	Verify back navigation from guide to listing	User is on a guide detail page	1. Click browser back button or breadcrumb link2. Observe	User is returned to the Guides listing page. Scroll position is reasonable.	Medium
TC-GUI-006	Verify Guides page mobile responsiveness	Guides page on 375px viewport	1. Set viewport to 375px2. Navigate to Guides3. Click into a guide	Guide list and detail pages are readable and usable on mobile.	High

Tab 4: Blog – Test Cases

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-BLG-001	Verify Blog page loads successfully	Browser is open	1. Navigate to https://solutionshub.epam.com/blog2. Observe	Blog listing page loads. Blog posts are displayed with title, date, and teaser.	High
TC-BLG-002	Verify 'Blog' is active in navigation	User is on Blog page	1. Navigate to Blog page2. Inspect navigation	'Blog' navigation link is visually marked as active.	High
TC-BLG-003	Verify blog post opens on click	Blog listing with at least one post	1. Click on any blog post title2. Observe navigation and content	Full article page loads. Author, date, and full content are displayed.	High

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-BLG-004	Verify blog images load correctly	User is on a blog post detail page	1. Open any blog article2. Inspect all images on the page	All images render without broken image icons. Alt text is present.	Medium
TC-BLG-005	Verify blog listing is sorted by date (newest first)	Blog page is loaded with multiple posts	1. Navigate to Blog2. Check the date stamps of first 3 posts	Posts are displayed in descending date order (most recent at top).	Medium
TC-BLG-006	Verify pagination on Blog listing	Blog page has more posts than shown on one page	1. Scroll to bottom of Blog page2. Click 'Next page' or page number	Next page of blog posts loads. URL or state updates to reflect new page.	Medium
TC-BLG-007	Verify back navigation from article to Blog listing	User is on a blog article page	1. Click browser back or breadcrumb link2. Observe	User returns to Blog listing. Previous scroll position is approximately restored.	Medium
TC-BLG-008	Verify Blog page responsiveness on mobile	Blog page on 375px viewport	1. Set viewport to 375px2. Navigate to Blog3. Open any article	Listing and article pages are readable and usable on mobile without horizontal scroll.	High

Tab 5: About – Test Cases

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-ABT-001	Verify About page loads successfully	Browser is open	1. Navigate to https://solutionshub.epam.com/about2. Observe	About page loads with HTTP 200. All content sections are visible.	High
TC-ABT-002	Verify 'About' is active in navigation	User is on About page	1. Navigate to About page2. Inspect navigation bar	'About' link is highlighted as the active menu item.	High

TC ID	Summary	Preconditions	Test Steps	Expected Result	Priority
TC-ABT-003	Verify all internal links on About page are functional	User is on About page	1. Click each internal link found on the page2. Observe navigation result	All internal links navigate to the correct target pages with HTTP 200.	High
TC-ABT-004	Verify external links open in new tab	About page is loaded with external links	1. Identify any external links2. Click each one3. Observe behavior	Each external link opens in a new browser tab. Original page remains unchanged.	Medium
TC-ABT-005	Verify 'Contact Us' button functionality	About page is loaded; 'Contact Us' button is present	1. Locate the 'Contact Us' button2. Click it3. Observe result	Contact modal opens OR user is navigated to contact form. No errors occur.	High
TC-ABT-006	Verify images on About page load correctly	User is on About page	1. Navigate to About page2. Inspect all images (logos, photos, illustrations)	All images render without broken icons. Images are appropriately sized.	Medium
TC-ABT-007	Verify About page responsiveness on mobile	About page on 375px viewport	1. Set viewport to 375px2. Navigate to About page3. Scroll through full page	All sections are readable. No horizontal overflow. Buttons are tappable.	High
TC-ABT-008	Verify About page content is complete and accurate	User is on About page	1. Read through all About page sections2. Verify key information is present	Company description, mission, and relevant information are present and accurate.	High
